

August 5th, 2019

Japanese Poultry Science Association

President Mitsuhiro Furuse

Co-organizers Shusei Mizushima

Motoi Kikusato

### **Mini-International Symposium**

**Title: Future perspective and issues in Japanese poultry science research**

**-Recent update in research on the developmental engineering-**

#### **Abstract:**

The purpose of this symposium is to provide the new insight and to discuss new research seeds in avian biology field. The symposiasts introduce the recent trends and state-of-the-art techniques and researches related to avian biology. There are two renowned scientists from China and Japan will talk about their excellent works and its future issues in the developmental engineering field. The organizers sincerely ask your encouragement and interest for this symposium which will help developing various fields of avian biology in Japan and other country.

#### **Program:**

16:30-16:40: Introduction

Dr. Shusei Mizushima (Faculty of Science, Hokkaido University)

16:40-17:10: 「Current status of local livestock and poultry genetic resources conservation in China」

Dr. Hong-Jian Wei (College of Veterinary Medicine, Yunnan Agricultural University)

17:10-17:40: 「Chicken and quail embryos are attractive model system for experimental developmental biology」

Dr. Yuki Sato (Graduate School of Medical Sciences, Kyushu University)

17:40-18:00 : Free discussion

**Venue:** 17th September (Tuesday), Poran Hall, Iwate University (Free admission)

**Registration:** Please submit your name and affiliation to following address until 10<sup>th</sup> September.
